

Quick Facts

Country: USA
Industry: US Navy
Locations: 33 Activities in 16 States

Solution

- Microsoft SQL Server
- Microsoft Windows SharePoint Services
- Microsoft Office Project + Project Publisher
- Microsoft Office Visio
- Microsoft Office Performance Point Server

Benefits

- Capture and reporting of Earned Value metrics across Warfare Centers
- Standardization of management tools and practices
- Centralization of planning and execution data for consistent portfolio reporting and analysis
- Integration with existing business systems and processes
- Flexibility to meet unique management & business requirements

Naval Sea System Command (NAVSEA) Warfare Centers

Warfare Center Keyport Deploys End-to-End Enterprise Project Management Solution Using Microsoft Project Server

Company

The largest of the Navy's five systems commands, Naval Sea Systems Command (NAVSEA) maintains the current Navy, acquires the next Navy and designs the Navy after next. Accounting for nearly one-fifth of the Navy's budget, NAVSEA manages more than 150 acquisition programs and has 33 activities in 16 states. With a force of 53,000 civilian, military and contract support personnel, NAVSEA engineers, builds, buys and maintains the Navy's ships and submarines and their combat systems. NAVSEA strives to be an efficient provider of defense resources for the nation, and it plays an important role in the Navy Enterprise. As a Provider

Command, it has the responsibility of directing resources from resource sponsors into the proper mix of manpower and resources to properly equip the Fleet. NAVSEA manages foreign military sales cases that include billions of dollars in annual military sales to partner nations. NAVSEA has the further responsibility of establishing and enforcing technical authority in combat system design and operation. These technical standards use the organization's technical expertise to ensure systems are engineered effectively, and that they operate safely and reliably. NAVSEA is organized into headquarters directorates and five affiliated Program Executive Offices.

Situation

NAVSEA's reorganization placed customer interface, financial management, project delivery, and technical Project Management responsibilities on the Project Leads. NAVSEA realized the need to provide established processes, tools or data that would help Project Leads understand and manage their project cost and schedule drivers. The NAVSEA Warfare Center has committed to improving their project and work management discipline and realizes the value and importance of systemization, efficiency, and scalability.

Objectives

The objectives of the NAVSEA Warfare Centers include:

- Improve project workload visibility
- Enforce best practices
- Improve project management and collaboration
- Improve resource management
- Improve project reporting relating to Earned Value, budget vs. actuals, resource allocation, resource task updates, etc.

"NAVSEA selected LMR Solutions' Microsoft based iEPM solution as the warfare center wide Enterprise Project Management solution over competing products such as Primavera, Artemis and other internally developed EPM systems."

Learn more about how some of our other aerospace and defense customers are benefiting from LMR Solutions iEPM Solution:

- BAE Systems
- General Atomics
- Intelligent Automation Company
- NAVSEA
- NASA
- Northrop Grumman
- Raptor
- Raytheon
- SAIC

Solution

NAVSEA Warfare Center's primary goal is to deploy an integrated baseline Enterprise Project Management (EPM) solution for viewing and managing all projects. Benefits to be gained from using this solution include the ability to:

- Take a top-down, structured approach to capture earned value metrics and monitor project performance at the command level.
- Advance project management processes and toolsets to foster team collaboration, improve control and enhance visibility into project performance and execution.

The NAVSEA Enterprise Project Management (EPM) architecture uses a Microsoft suite of NMCI-approved products for cost and schedule management (MS Office Project, Windows SharePoint Services, SQL Server, Project Publisher, and Office Performance Point).

About LMR Solutions

LMR Solutions is a full-service program and project management firm, we help organizations evaluate and standardize on PM processes, training, Microsoft technologies and staff augmentation. LMR Solutions is Microsoft's "EPM Partner of the Year" in the West Region for 2005 and was awarded the Microsoft Global EPM Excellence Award for 2006. Our Award Winning iEPM (integrated Enterprise Program Management) Solution, includes components for Opportunity Management, Portfolio Management, Project Management, Collaboration and Business Intelligence all built using familiar Microsoft programs. LMR Solutions offers the solution framework and the professional services expertise to fully deploy Enterprise Project Management and support your Project Management requirements.
